Experienced software engineer with 2 years of full-stack development expertise. Skilled in designing robust software solutions across front-end and back-end technologies. Collaborative, deadline-driven, and up-to-date on emerging trends. Passionate about problem-solving and delivering efficient, scalable solutions to enhance user experiences.

PROFESSIONAL EXPERIENCE

COGNIZANT TECHNOLOGY SOLUTIONS PLANO, TX

Front-End Developer, June 2022 — Present

- Developed a comprehensive employee training tracking system using React, Spring Boot, SonarQube, and other technologies to ensure seamless onboarding and training management for new hires.
- Collaborated in a team-oriented environment to achieve successful project outcomes and collective goals.
- Contributed to developing a photo-sharing social media platform, emphasizing visual content and user connections using Angular, Material-UI, Jenkins, and more.
- Successfully executed projects with cross-functional teams using Scrum, ensuring timely delivery of high-quality solutions
- Utilized Git for collaborative development, code review, and efficient version control.

THE RHODES USA COMPANY MILWAUKEE, WI

Software Developer, January 2021 — August 2021

- Leveraged Google Apps Script and JavaScript expertise to optimize data management, improving system performance, integrity, and streamlining processes.
- Enhanced code reusability by implementing best practices and design patterns, boosting development efficiency and encouraging modular, maintainable code.
- Automated project tasks with reliable Linux shell scripts, enhancing productivity and delivery timelines.
- Utilized Scrum process and Git while actively collaborating with cross-functional teams, fostering a consistent work environment to achieve project objectives.
- Proven dedication to high-quality solutions, tech optimization, and project success.

EDUCATION

MILWAUKEE SCHOOL OF ENGINEERING MILWAUKEE, WI
